```
import { RouterLink } from '@angular/router';
3
4 @Component({
5   selector: 'app-navbar',
6   standalone: true,
7   imports: [RouterLink],
8   templateUrl: './navbar.html',
9   styleUrls: ['./navbar.css'],
10 })
11 export class Navbar {}
```

A screenshot of a dark-themed code editor. On the left, a sidebar shows files: header, navbar, app.config.ts, # app.css, app.html (which is selected), app.routes.ts, app.spec.ts, app.ts, index.html, main.ts, # styles.css, .editorconfig, and .gitignore. The main area shows a CSS snippet for a host selector with various color definitions. At the bottom, a terminal window shows the command: PS C:\Users\em1d1\practica04-angular> ng generate component components/header.
